Summary

I am a motivated **B.Tech Computer Science Engineering** student with strong proficiency in **Python, SQL, C**, and hands-on experience in **data analysis, machine learning, and data visualization** using tools such as **Power BI** and **Tableau**. Certified through industry-recognized programs including **IBM, Accenture, Deloitte, Quantium, and FreeCodeCamp**, with practical exposure to predictive modeling and business analytics. Actively seeking an **internship in Data Analysis, Machine Learning, Python, or AI** to apply analytical skills in real-world projects and contribute to data-driven decision-making.

Education

Guru Nanak Institutions Technical Campus, Computer Science and Engineering — Nov 2022 – Jul 2026

Narayana Junior College — 2020 – 2022

Intermediate(MPC) - CGPA 8.9

Candor Shrine I Senior Secondary School — 2019 – 2020

- **Coursework:** Data Analytics, Data Visualization, Machine Learning, Microsoft Excel, Power BI, Tableau

Experience

Data Analytics, Google (Coursera) – India, Hyderabad — May 2025

Null Class, Data Analytics Internship – India, Hyderabad — Mar - Sept 2025
LOR: View Letter of Recommendation

Unified Mentor, Data Analytics Internship – India, Hyderabad — Jul - Nov 2025
LOR: View Letter of Recommendation

Data Analytics Job Simulation, Deloitte (Forage) – India, Hyderabad — Apr 2025

Projects

Stock-Market Analysis using Machine Learning — Apr – May 2025

- Developed a Python-based project to analyze and visualize real-time and historical stock market data using financial APIs. Performed data preprocessing and analysis with **Pandas**, applied technical indicators such as **Moving Averages, RSI, and Bollinger Bands** to identify market trends, and created interactive dashboards for real-time monitoring. Gained hands-on experience in **data analysis, financial modeling, and data visualization** to support data-driven investment insights.
- **Tools Used:** Python, libraries – Pandas, NumPy, Plotly, Matplotlib, Seaborn

Coca Cola Stock using Machine Learning — Jun – Jul 2025

- Performed data upload and cleaning, followed by exploratory data analysis (**EDA**) and visualization using Python libraries. Built and trained a logistic regression model with proper data splitting for stock trend prediction. Developed an interactive dashboard with **Streamlit** to visualize predictions and insights in real-time.
- **Tools Used:** Python, libraries – Pandas, NumPy; Web App Framework: Streamlit

Technologies

Languages: C , Python , SQL

Technologies: Microsoft Excel ,Power BI, Data Analysis , Data Visualization , Machine Learning, Tableau
